## PROFESSIONAL SUMMARY

---

Technical support professional with 4+ years of enterprise SaaS experience and deep expertise in AI products, including hands-on experience with Claude Code, API integrations, and LLM deployments. Combines proven ability to meet SLA targets and resolve complex technical issues with strong written communication skills demonstrated through 1,500+ published tutorials. Known for user empathy, meticulous attention to detail, and translating complex AI concepts into clear, actionable guidance. Passionate about Anthropic's mission and actively creates educational content helping users adopt Claude and other AI tools.

## RELEVANT EXPERIENCE

---

### AI Tutorial Creator & Technical Educator | Mike Murphy, LLC | 2015 – Present

#### Technical Support & User Advocacy

- Deliver real-time technical support across YouTube comments, email, and social media with 100% response rate, debugging complex issues including API configurations, workflow automations, and AI tool integrations.
- Created multiple Claude Code tutorials including "How To Install Claude Code On Mac" and "Claude Code + n8n: How To Import MCP Server" demonstrating deep familiarity with Anthropic's products.
- Investigate and resolve user-reported issues across diverse technical setups, documenting solutions for 41,500+ subscribers with varying skill levels.

#### API & Documentation Expertise

- Produced 25+ AI-focused tutorials teaching API integrations (OpenAI, Claude, Gemini), RAG systems, vector databases, and workflow automation.
- Created step-by-step documentation for API key generation, credential configuration, and endpoint testing using Postman.
- Built production systems demonstrating API debugging skills: custom RAG implementations, n8n webhook integrations, and Ollama LLM deployments.

#### Technical Communication

- Authored 1,500+ technical tutorials translating complex concepts into clear, actionable guidance for both technical and non-technical audiences.
- Developed comprehensive knowledge base content covering AI workflows, VPS configuration, database setup, and troubleshooting.

### Senior Technical Account Manager | SimpleCast + Sirius XM | 2018 – 2022

#### Escalated Technical Support

- Delivered platform training and technical support to 100+ enterprise clients using Intercom and Zendesk, consistently achieving SLA targets.

- Managed complex technical account issues requiring API debugging, platform configuration, and cross-functional coordination.
- Owned case lifecycle from initial investigation through resolution, maintaining detailed documentation of technical issues and solutions.

### Support Infrastructure & Collaboration

- Created knowledge transfer materials and support documentation to scale team capabilities post-acquisition.
- Coordinated directly with product and engineering teams via Asana, Jira, and Slack to escalate bugs, track feature requests, and ensure smooth client outcomes.
- Supported diverse client personas from independent creators to enterprise accounts, adapting communication style accordingly.

### Studio Manager | Heather Donlan Photography | 2007 – 2016

- Served as primary technical resource, solving IT and workflow issues to maintain operational continuity.
- Self-taught across Adobe Creative Cloud, WordPress, and business systems through persistent curiosity and hands-on experimentation.

## TECHNICAL SKILLS

---

**AI & Anthropic Products:** Claude Code, Claude API, MCP Server integration, prompt engineering, RAG systems, LLM deployment (Ollama, OpenAI, Gemini)

**APIs & Technical Tools:** API testing (Postman), webhook configuration, n8n workflow automation, REST API debugging, JSON/HTTP troubleshooting

**Support Platforms:** Intercom, ZenDesk, Jira, Asana, Slack, GitHub Issues

**Documentation:** Technical writing, tutorial production, knowledge base creation, screen recording (ScreenFlow), video documentation

**Infrastructure:** PostgreSQL/pgvector, VPS hosting, Docker, GitHub, Python scripting

## EDUCATION

---

**Masters in Law Administration** | University of Denver School of Law | GPA: 3.98

**B.A. English (Cum Laude)** | University of Massachusetts-Amherst | GPA: 3.35

## WHY ANTHROPIC

---

I'm genuinely passionate about Anthropic's mission and products. I've created multiple tutorials helping users adopt Claude Code, and I use Claude daily in my own AI development work. I understand firsthand the challenges users face when integrating AI into their workflows—because I've solved these problems myself and taught others to do the same. I'm excited about the opportunity to bring this perspective to Anthropic's support team, helping users succeed while contributing insights back to the product.
