Professional Summary

AI educator and technical content creator with proven expertise in teaching complex AI concepts through 25+ comprehensive tutorials covering RAG systems, LLM deployment, vector databases, and workflow automation. Combines 4+ years of enterprise tech support experience with a passion for demystifying cutting-edge AI tools for creators and developers. Skilled in building production AI systems (RAG, n8n workflows, VPS-hosted LLMs) while creating educational content that empowers 41,500+ subscribers. Known for patient problem-solving, clear technical communication, and translating advanced AI topics into actionable learning experiences.

Experience

AI Tutorial Creator & Technical Educator – Mike Murphy, LLC (2015 – Present)

- Created 25+ AI-focused tutorials (2024-2025) teaching RAG systems, Claude Code, n8n automation, Ollama LLM deployment, PostgreSQL/pgvector, VPS hosting, and API integrations to 41,500+ YouTube subscribers.
- Built and documented production AI systems including a custom RAG implementation for mining chat history, self-hosted n8n workflows on VPS, and Ollama-based local LLM deployments.
- Produced 1,500+ total educational tutorials covering AI, After Effects, audio production, and creative tools, with courses published on Domestika and personal platform.
- Delivered real-time technical support across YouTube comments, social media, and email with 100% response rate, debugging complex technical issues and guiding users through AI tool adoption.
- Demonstrated thought leadership through 155-episode podcast documenting the transition from "Tech Handyman" to "RAG Handyman," including a 10-year anniversary episode on AI pivot strategy.

Senior Technical Account Manager – SimpleCast + Sirius XM (2018 – 2022)

- **Delivered platform training and technical support to 100+ enterprise clients using Intercom & ZenDesk, consistently achieving SLA targets.**
- **Managed complex technical account issues related to podcast hosting, distribution, and analytics, while creating customized support documentation and video tutorials.**
- **Created knowledge transfer materials and coordinated directly with product and engineering teams via Asana, Jira, and Slack to ensure smooth client onboarding after acquisition.**

Studio Manager – Heather Donlan Photography (2007 – 2016)

- **Provided full-spectrum creative and tech support, managing photo retouching, web updates (WordPress), invoicing (FreshBooks), and IT troubleshooting for a busy photography studio.**
- **Developed expertise across Adobe Creative Cloud, WordPress, and Google Workspace through continuous self-learning and hands-on experimentation.**
- **Maintained operational continuity by serving as the studio's primary tech resource, solving IT and workflow issues quickly to ensure seamless client service.**

Education

Masters in Law Administration University of Denver School of Law (2005 – 2007) GPA: 3.98

B.A. English (Cum Laude) Univ. of Massachusetts-Amherst (1988 – 1992) GPA: 3.35

Skills

- **AI & Machine Learning: RAG Systems, Vector Embeddings, LLM Deployment (Ollama, OpenAI, Claude, Gemini), Prompt Engineering, sentence-transformers, Hugging Face Models**
- **Development & Infrastructure: Python (scripting, RAG implementations), PostgreSQL/pgvector, VPS Hosting & Management, GitHub, Docker, API Integration, CloudFlare**
- **AI Workflow Tools: n8n (automation & orchestration), Claude Code, Streamlit, Neon Postgres, Postman (API testing), Telegram Bots**

- **Content Creation & Education: Technical Tutorial Production, Course Development, After Effects Animation, Video Editing, Podcasting, Technical Documentation, Screen Recording (ScreenFlow)**
 - **Support & Collaboration: Intercom, Zendesk, Asana, Trello, Jira, Slack, Customer Success, Technical Account Management**
 - **Platforms & Tools: VS Code, WordPress, Google Workspace, YouTube, Adobe Creative Cloud (After Effects, Audition, Photoshop), Descript, eCamm Live**
 - **Core Competencies: Patient problem-solving, Technical communication, Remote support, Self-directed learning, Public speaking (webinars)**
-

Featured Projects

CV-RAG: Interactive AI Resume System Built a production RAG system combining vector search and LLM generation to create a chat-based resume interface. Tech Stack: Python, PostgreSQL/pgvector, Neon managed database, Ollama (Llama 3), n8n workflow orchestration, Streamlit frontend, sentence-transformers embeddings. Impact: Demonstrates end-to-end AI system architecture while serving as a unique job application tool.

Chat History RAG System Developed a custom RAG implementation to semantically search personal AI conversation history, extracting insights and patterns from past interactions. Featured in YouTube tutorial "How I Built a RAG System to Mine My AI Chat History for Gold." Tech Stack: Python, vector embeddings, PostgreSQL/pgvector, LLM integration.

Self-Hosted AI Infrastructure Deployed and maintained production VPS environment hosting Ollama LLM models, n8n automation workflows, and PostgreSQL databases. Includes firewall configuration, package management, and continuous updates documented through tutorial series. Impact: Enables cost-effective AI experimentation and production deployments outside cloud provider lock-in.

Creative & Personal Interests

- **Audio production, photography, and videography**
- **Writing, storytelling, and podcasting**
- **Exploring AI tools for creative workflows**
- **Playing guitar and harmonica**
- **Minimalist living and wellness**
- **Completed the Camino de Santiago pilgrimage (650 miles + 1 million steps)**
