

Michael J. Murphy

AI Engineer | Technical Educator | Systems Architect

 mike@mikemurphy.co |  mikemurphy.co |  linkedin.com/in/mikemurphyco

Summary

AI engineer with hands-on expertise building production RAG systems, deploying LLMs, and implementing end-to-end AI infrastructure including vector databases, embeddings, and workflow orchestration. Combines 4+ years enterprise technical support experience with deep AI systems knowledge gained through 25+ production implementations. Skilled at translating complex AI technology into practical solutions and technical training materials.

Technical Skills

AI & Machine Learning: RAG Systems, Vector Embeddings, LLM Deployment (Ollama Llama 3.2, OpenAI GPT-4, Claude, Google Gemini), sentence-transformers, Hugging Face, LangChain, Prompt Engineering

Development & Infrastructure: Python (RAG implementations, API integrations), PostgreSQL/pgvector, VPS Hosting (Ubuntu, Docker, security hardening), Git/GitHub, API Development (Postman, REST, webhooks), Cloud (Neon Postgres, Streamlit Cloud)

AI Workflow & Automation: n8n (workflow orchestration, AI agent pipelines), Claude Code, Streamlit, Docker

Collaboration: Technical Training & Documentation, Customer Success (Intercom, Zendesk, Asana, Jira, Slack), Technical Account Management, Remote Support

Professional Experience

AI Tutorial Creator & Technical Educator | Mike Murphy, LLC | 2015 – Present

Production AI Systems: Designed and deployed end-to-end RAG system combining PostgreSQL/pgvector, Ollama LLMs, n8n workflow orchestration, and Streamlit frontend. Self-hosted production VPS environment with Ollama models, n8n automation, and PostgreSQL including firewall configuration, security hardening, and continuous updates.

Technical Education: Created 25+ AI technical tutorials (2024-2025) teaching RAG systems, Claude Code, n8n automation, Ollama LLM deployment, PostgreSQL/pgvector, VPS hosting, and API integrations to 41,500+ YouTube subscribers. Produced comprehensive setup guides and troubleshooting documentation for complex AI implementations.

Technical Support: Delivered responsive support with 100% response rate, debugging complex issues including API configurations, database connections, embedding model deployments, and workflow automation.

Key Projects: - **CV-RAG System:** Interactive RAG with Python, PostgreSQL/pgvector, Ollama (Llama 3), n8n workflows, Streamlit frontend - **Chat History RAG:** Custom RAG for semantic search of AI conversation archives - **VPS AI Infrastructure:** Self-hosted production environment for cost-effective AI deployment

Senior Technical Account Manager | SimpleCast + Sirius XM | 2018 – 2022

Delivered platform training and technical support to 100+ enterprise clients via Intercom & ZenDesk, consistently achieving SLA targets. Managed complex technical escalations involving APIs, webhooks, and third-party integrations. Created customized support documentation and video tutorials. Coordinated with product and engineering teams via Asana, Jira, Slack to resolve technical issues and improve platform reliability.

Education

Masters in Law Administration | University of Denver School of Law (2005-2007) | GPA: 3.98

B.A. English (Cum Laude) | University of Massachusetts-Amherst (1988-1992) | GPA: 3.35

Key Accomplishments

- Built and documented production RAG systems from scratch with full self-hosted infrastructure
- Published 1,500+ technical tutorials focused on AI, automation, and developer tools
- Grew educational platform to 41,500+ subscribers through clear technical teaching
- Self-taught AI engineer with proven ability to rapidly learn and implement cutting-edge technologies
